

Eugene Grigor'ev

Global Thermonuclear
Energetics

ГЭЭГ

**Eugene Aleksandrovich
Grigor'ev**

1. PROBLEM

Describe the essence of the problem that solves your product:

- The problem of clean energy damage
- There is worldwide
- Now the problem is solved with the help of alternative energy sources.
- Mankind pay 3 trillion €/year to solve this problem.

Energy is expensive and environmentally dirty (greenhouse gases, nuclear waste, waste heat, etc.)

How do people solve it now? - search for cheap, reliable, safe and environmentally friendly energy

A great scientific discovery has been made that allows the creation of a long-awaited compact, powerful, cheap, safe and environmentally friendly thermonuclear reactor (not yet achieved by modern science and technology).

2. DECISION

Created a new type of trap for thermonuclear plasma

I assume that people will use my power plant instead of the existing ones because it is cheaper {"burned" water}, more compact {up to gadgets}, more environmentally friendly and safer

**A new design of a thermonuclear plasma trap has been developed.
Confirmed experimentally.
This cheap, compact, safe and environmentally friendly fusion reactor is the dream of all physicists, power engineers and environmentalists.**

**Electricity cost less than 0.02 € / kWh
(3-10 times cheaper than now).
Heat cost less than 5 € / Gcal.**

3. DECISION

Thermonuclear reactor - in every house, car, UFO and gadget

The most important criterion is cheapness and safety.

4. MARKET

The global electricity market in 2016

200 trillion ₪ and growing rapidly

The market will only grow due to easy accessibility.

energy (mechanical, electrical, heat) in any point of the Earth and the Solar System, as the discovery allows you to create a thermonuclear rocket engine, which is 2000 times more efficient than chemical-fueled engines.

5. BUSINESS MODEL

Describe how you earn
What, what business model –
while not earning - is a project.

10000 ₺

Average check

1000000 ₺

Revenue from the
client during his "life"

6. COMPETITORS

Energy minners

Energy producers

Power plant manufacturers

Energy distributors

7. COMPETITIVE ADVANTAGES

Why choose us?

**Cheapness, safety, easy accessibility.
Electricity cost less than 0.02 € / kWh
(3-10 times cheaper than now).
Heat cost less than 5 € / Gcal.**

Why choose us?

**Why can we reach our goal? - because there is I.
I am able to remotely (e-mail, Skype) direct scientific and technical work and direct research in the right direction.
But the most important thing is that I can think very effectively.
With me can happen - without me will not work exactly.**

8. CURRENT STAGE

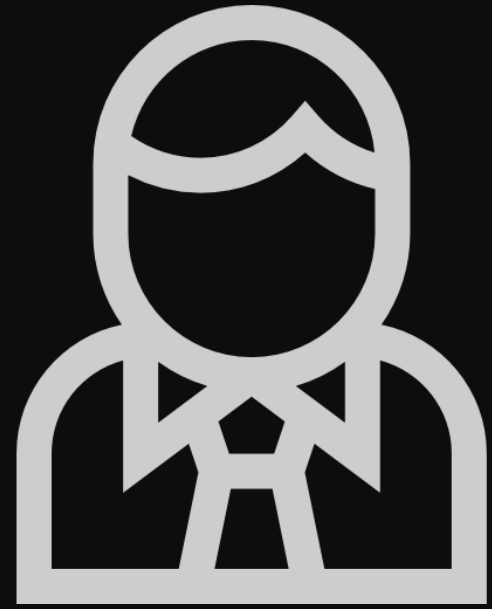

Today, turnover - 0 ₱

Clients - 7 billion

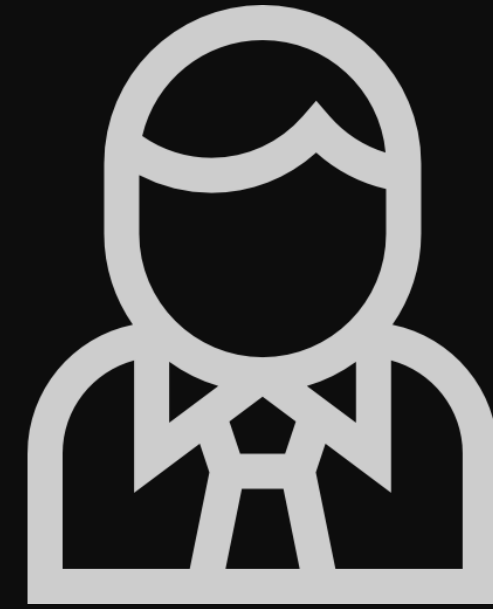

Goal - 1500 trillion ₱

I am a thermonuclear physicist, now in a psychiatric hospital, where I ended up for a great scientific work. I am going to the victory of MIND and the energy abundance of Mankind.

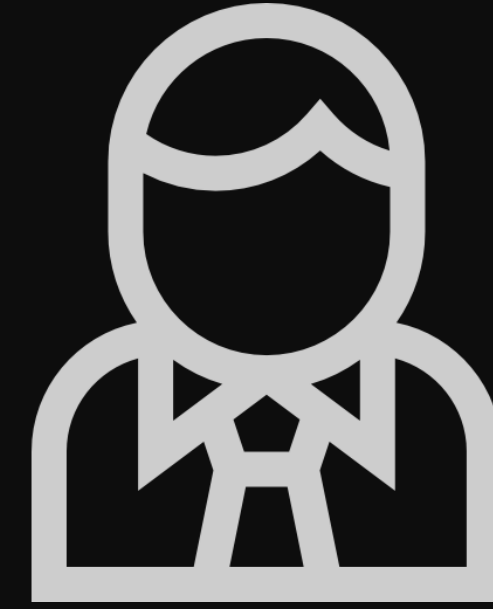

9. TEAM

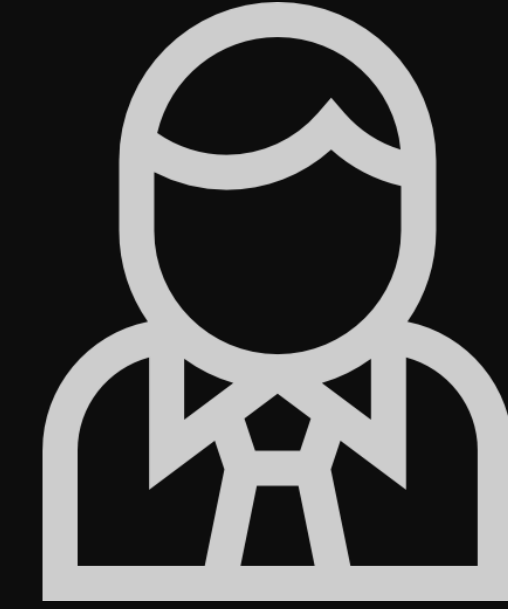

The first
Project Manager

Another
Business manager

Else
Science Manager

Else
Technical supervisor

Team recruited as needed

10. TO INVESTORS

We are looking for 60 months financing to reach 1 million transactions in the amount of 200 million ₺

100% on invested money.
Sales revenue.

3 mln €

Need so much

THIS

On research development, introduction and promotion

6 mln €

Refund so much

THANK !!!

**A fusion physicist, by the malicious envy of
pseudoscientists, placed in a psychiatric hospital.
I am looking for partners with head and hands.**
